

Devon Jones

Full Stack Software Engineer

Richmond, VA | 703-408-6087 | linesbydevon@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Design-minded Software Engineer who values creativity and experimentation. Motivated to create experiences that are as impactful and fun as they are sophisticated and intuitive. I prioritize the user experience at each step of the development process and dedicate myself to leveraging new technologies to actualize the vision.

SKILLS

- Languages: HTML, CSS, SCSS, JavaScript, React.js, SQL, Sequelize, Python, Django
- Tools: Visual Studio Code, Adobe Creative Suite, Postico, Insomnia, Litmus, Email on Acid

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | October 2022 – January 2023

Successfully completed 500+ hours of expert led instruction software engineering and hands-on learning of web development fundamentals and the industry's most in demand technologies. Developed projects, including:

- JUGR-KNOT: Built with HTML, CSS, JavaScript | [GitHub Repository](#) | [Deployed Link](#)
- LamboWhen: Built with React.js, CSS | [GitHub Repository](#) | [Deployed Link](#)
- DR0P1n: Built with React.js, Django, Mapbox.js, CSS | [Github Repository](#) | [Deployed Link](#)

Web Designer | Capital One | Richmond, VA | April 2020 – September 2022

- Utilized Sketch and Adobe software to design and optimize assets for deployment in external emails.
- Developed emails with code snippets in addition to custom HTML and CSS.
- Collaborated with project managers, copywriters, and internal partners to develop strategy, identify challenges, and deliver effective and timely products.
- Performed technical review of peer developers' code to ensure congruence with internal brand, technical, and accessibility standards for email development.

Web Designer | EAB | Richmond, VA | March 2019 – March 2020

- Promoted from Junior Web Designer to Web Designer based on exemplary performance.
- Utilized Adobe software to design layouts and visual assets for emails, landing pages, and social media display advertisements.
- Leveraged knowledge of conversion-centered design, HTML and SCSS to develop web pages and emails that were brand appropriate, responsive, and accessible.
- Collaborated with copywriters, print designers, and digital marketing specialists to develop campaigns that were effective and cohesive.
